SZP

FLEXIBLE AND COST-EFFICIENT. THE SZP.

The sheet metal used to make ventilation ducts need to be strengthened in order to prevent undesirable vibration. The Z-form has proved the optimum solution here. The SZP profiling machine allows simple and rational reinforcement of sheets in widths from 2000 mm to a maximum of 3000 mm. A low-noise gear motor drives the lower profile rollers and ensures a high throughput speed of 20 m/min.

BENEFITS

- ✓ **Uniform profiling height** over the entire working width
- ✓ **High throughput speed** of 20 m/min.
- ✓ **Practical:** Fold can be produced even after profiling
- ✓ **Extra long** and very strong in ventilation construction
- ✓ Shaped cuts are profiled in a straight line and **without distortion**
